**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-11,14-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Winter'242.

The applied reference teaches the claimed invention substantially as claimed. See abstract, Summary of the invention, column 2, lines 33-42, column 3, lines 18-25, column 5, lines 25-33, column 6, lines 30-67, column 7-8.

The Winter'242 does not specifically teach the particle shape, pigments of claim 9, polymers of claim 11 and that polymer is applied to the particle surface by precipitation. However, it would have been obvious to one having ordinary skill in the art at the time of the invention to optimize particle shapes as well as pigments materials and polymer used for

composition since such would stabilize composition and improve mechanical properties of such composition. It would have been obvious design choice to select a specific method to apply polymer layer to the surface.

The amendments and remarks filed by Applicants have been fully considered. The arguments have been persuasive regarding rejections based on 35 USC 102, which rejections have been withdrawn. However, the examiner believes that the above rejections based on obviousness are proper.
